**Alerting Abstract EP A1**

The extruded compsn., in the form of a soft paste, includes (a) a fatty phase and (b) a cpd. with initial m. pt. at least 100 (deg)C.

USE - For care of the skin and/or as make-up for the lips and/or skin, e.g. a make-up foundation, a lipstick, or a compsn. for care of the body or face.

ADVANTAGE - The cosmetic is anhydrous and of uniform texture, with no fatty feel.

**Original Publication Data by Authority**

**Original Abstracts:**

Extruded soft paste contg. fatty phase and cpd. with high initial m. pt.  
The extruded compsn., in the form of a soft paste, includes (a) a fatty phase and (b) a cpd. with initial m. pt. at least 100 degrees C.

The present application relates to an extruded cosmetic composition, provided in the form of a soft paste, comprising, in a fatty phase, at least one compound having a high melting temperature. The invention also relates to a process for preparing the composition by extrusion.

The present application relates to an extruded cosmetic composition, provided in the form of a soft paste, comprising, in a fatty phase, at least one compound having a high melting temperature. The invention also relates to a process for preparing the composition by extrusion.

The present invention concerns an extruded cosmetic composition in the form of a flexible paste comprising in an oily phase at least one compound with a high melting point. The invention also concerns a process for preparing this composition by extrusion.
